

Hands-on Training
on
P-N Junction Diode
and
Perovskite Solar Cells

Sept 2-11, 2024

**Centre for NEMS &
Nanophotonics, IIT Madras**

About INUP-i2i

Indian Nanoelectronics User's Programme - Idea to Innovation (INUP-i2i), supported by the Ministry of Electronics and Information Technology (MeitY), GOI, offers the basic and advanced level training programs to the prospective users working in the general area of nanoelectronics. Six MeitY supported centers, including IIT Madras, open up their nanofabrication and characterization facilities for the R&D to researchers nationwide.

Fabrication & Characterization of P - N Junction Diode & Perovskite Solar-cell Devices

The purpose of this workshop is to offer hands-on training to the prospective users of nanofabrication and characterization facilities available at CNNP IIT Madras. This workshop will focus to train the participants on the modules for the Fabrication and Characterization of P-N Junction Diode and Perovskite solar cells.

Online applications are invited from interested researchers from academia for participation in this workshop. While selecting the participants, preference will be given to faculty members/ students who are implementing/have submitted R&D projects under INUP-i2i at IIT Madras or are planning to do so.
